Description: **GEARGUARD Camera BAG Lock LARGE**

RRP: **\$24.95**

Quick overview:

Gary Fong's NEW **GearGuard™ Camera BAG Lock** enables a camera bag to be locked closed and even secured to a fixed object (with the combination cable and lock set), granting the photographer freedom to focus on the moment at hand rather than worry about equipment disappearing.

GearGuard™ Camera BAG Lock prevents theft by restricting access to the bag's quick-release buckles. The patented two-piece clip slides together over the buckle and when locked with the **GearGuard™** Combination Lock (like the Camera **BODY** Lock) enables the photographer to operate in congested areas without concern for theft. Alternatively, photographers can leave their bags tethered to a permanent anchor using the ultra strong **GearGuard™** Security Cable, knowing that the gear will remain where it was left. **GearGuard's** 36" BRAIDED steel security cable is entirely coated in rubber to prevent scratches to expensive equipment. It is extremely flexible, but cannot be cut with hand tools.

GearGuard™ Camera BAG Lock features

- **BAG Lock** is available in SMALL and LARGE sizes
- The set features **two** twin-plate design locks per package
- Allows your camera bag to be locked
- Allows your camera bag to be secured to a fixed anchor
- **Camera BAG Lock** is designed to work with the **GearGuard™** Combination **LOCK** and 91cm Security **CABLE SET** sold separately
- **GearGuard™ by Gary Fong** is designed and manufactured in the USA

"For years, photographers have had serious concerns about the vulnerability of their equipment to theft while they're busy shooting an event or working with customers, and we all have horror stories about expensive gear turning up missing. Whether you measure the value of your camera and gear in hundreds or thousands, our lightweight and compact **GearGuard** products will ensure safe travel and storage at an affordable price," said Gary Fong, internationally renowned photographer and CEO of Gary Fong, Inc. "With the launch of our GearGuard line, photographers can safely devote their full attention to their craft rather than continually worrying about their costly equipment."
