

Category: <b>Flash Diffusers</b>	SKU: <b>LSC-01</b>	Brand: 
-------------------------------------	-----------------------	--

Description: LIGHTSPHERE COLLAPSIBLE

RRP: \$99.95

Quick overview:

Gary Fong introduces Lightsphere Collapsible, the new evolution of the famed Lightsphere series of diffusers.

\*\*\*WINNER of POPULAR PHOTOGRAPHY POP AWARD 2010 for Outstanding Product\*\*\*

\*\*\* BEST DIFFUSER by PHOTOPLUS Magazine UK \*\*\*

\*\*\* SWPP Award BEST PROFESSIONAL ACCESSORY \*\*\*

Perfect for portraits and head shots - get the best light diffusion available from your on-camera flash. Professionals know soft light comes from large diffusers – and until now have had to compromise light quality for space. The Lightsphere Collapsible folds to a height of less than 4 cm, easily fitting into your camera bag.

- Collapses down to a 3.8 cm thick ring allowing for easy storage in your camera bag.
- Utilizes patent pending sizing ribs that provide an equally tight fit to several sizes of flashes without the need for straps or bands.
- Universal Fit - base mount opening is highly stretchable (5cm x 8.3cm) fitting most flash units.
- The Inverted Dome is included with every Lightsphere Collapsible Purchase.
- Works with your existing accessory domes - AmberDome, PowerGrid, and can be mounted right-side up or upside-down.
- It also fits the ChromeDome (requires adapter ring which is included in your Lightsphere Collapsible box)
