Description: POWERSNOOT (High Power Focused Beam)

RRP: \$99.95

**Quick overview:**

The PowerSnoot is a chrome-plated, long snoot with a grid that allows you to achieve dramatic and spectacular lighting effects using regular speedlight equipment.

POWERSNOOT concentrates the light from your flash to create dramatic highlights. Instantly add “Fashion Style” photography to your repertoire.

Travelling with large light set ups will become a thing of the past. The Gary Fong PowerSnoot has been designed with portability in mind. This device will replace the need for cumbersome light modifiers and allow you to maximize the efficiency of your strobe but with more directional control.

Mounted off camera, instead of filling a room with soft light, the parabolic reflective interior will allow you to focus light into the areas you want to highlight, and more importantly away from where you don't. Mounted on camera you now have tool for creating cutting edge special effects.

For Sports or Wildlife Photographers - mount the PowerSnoot directly on your on-camera flash to deliver flash power to where you need it for long telephoto lenses. The PowerSnoot mounts onto the flash unit with the same patent pending grip system as our Lightsphere Universal. It is so strong that it can support the entire weight of a camera, drive and flash securely.
