Description: WHALETAIL STUDIO Complete Kit

RRP: \$219.95

Quick overview:

The Complete WhaleTail Flash Diffusion System – STUDIO, includes the large WhaleTail STUDIO diffuser with mounting kit, 4-colour instructional brochure, an accessory gel kit, regular flaps, amber flaps and chrome flaps.

The WhaleTail STUDIO is perfect for use inside a studio as its' larger size ensures a stronger diffusion effect. The innovative mounting design provides a secure and adjustable grip to any flash head, from a Nikon SB-600 to a Metz 45. The WhaleTail is also the first diffuser to offer rear-wall bouncing.

For softness, the rear panel can be flipped up to provide an open back, which allows the light to bounce off a rear wall. The top flap lifts up to facilitate ceiling bouncing.

The WhaleTail has a slot in its base for the use of coloured filters. Depending on which one is used, they allow for warming, cooling, or special effects.

FEATURES

- Large diffuser for maximum light diffusion.
- Multi-directional design negates the need for a flash bracket.
