

SP72

This stylish dark espresso solid wood digital picture frame easily displays your favourite memories with an automatic slideshow. With a 7 inch display and 480 x 234 resolution, pictures display crisp and clean.

The SP72 digital frame includes a built-in SD/MMC, MS and xD card reader which allows memory cards to be inserted into the side of the frame. Once the memory card is inserted into the frame or saved onto the internal 128MB memory, photos are ready to be displayed.

Short Description

- 7 inch display with 480x234 LCD screen
- 128 MB of internal memory stores almost 2,000 images
- Import pictures from any popular memory card
- Stylish wood frame design
- View pictures in a continuous slideshow
- Automatic On/Off timer

SPX7E

Elegance and simplicity work together in this stylish 7 inch digital picture frame. The beautiful solid wood frame will complement any room or environment. View your favourite memories stored on the internal 256MB as a slide show of up to 3,000 pictures with different transition effects.

Advanced SyncPix™ software included on the frame will automatically resize your pictures while copying them. Smartparts innovative smart scaling will resize pictures keeping the focus on the most important areas without distorting the image.

Short Description

- Pin sharp 800 x 480 WVGA resolution
- Simple, automatic picture transfer with optimization feature that does it all for you
- Bright and clear screen quality
- SyncPix™ smart album feature - organizing made easy
- Contemporary design that will complement any setting
- 256 MB of internal memory stores about 3,000 pictures
- Import pictures, videos, and music from most popular memory cards and USB
- Film strip navigation - find your pictures with ease
- New easy user interface for your viewing pleasure

SPX8E

Elegance and simplicity work together in this stylish 8.4 inch digital picture frame. The beautiful solid wood frame will complement any room or environment. View your favourite memories stored on the internal 1GB as a slide show of up to 4,000 pictures with different transition effects.

- 1GB of internal memory stores about 4,000 pictures
- Import pictures, videos, and music from any popular memory card and USB
- Film strip navigation - find your pictures with ease
- New easy user interface for your viewing pleasure

SPX8WF

Easy picture transfers, an intuitive interface and the ability to store and organize up to 5,000 photos are just a few of the features that make this 8" Wi-Fi enabled SyncPix™ model a leader in digital picture frame design.

Housed in an ultra-slim case with a rich espresso-coloured wood frame, this digital frame is the ultimate in style and functionality. Users simply insert their memory card into the frame and allow the SyncPix™ software to resize and optimize copies onto the frame's generous 512 MB internal memory. Photos and music files can be rearranged and sorted into "albums," allowing complete customization of slide shows.

Short Description

- Wi-Fi connection, each SPX8WF has its own unique e mail address
- Sharp 800 x 600 SVGA resolution
- Simple, automatic picture transfer with optimization feature that does it all for you
- Bright and clear screen quality
- SyncPix™ smart album feature - organizing made easy
- Slim contemporary design that will complement any setting
- 1GB of internal memory stores about 5,000 pictures
- Import pictures, videos, and music from any popular memory card and USB
- Film strip navigation - find your pictures with ease
- New easy user interface for your viewing pleasure

SP1000EF

Classic styling and convenience combine in this 10.4 inch solid wood digital picture frame. Pictures are sharp and vibrant thanks to the high resolution 800 x 600 pixel LCD panel. Photos can be viewed in an automatic slide show or one at a time. The slim design digital frame is easily controlled with the patented toggle switch design, or included remote control.

Updating the 256MB internal memory is easy with the pre-installed OptiPix Pro software for Windows. This proprietary software “smart scales” photographs so that approximately 2,000 images can be stored on the internal memory.

Short Description

- 10.4 inch VGA display with 800x600 resolution
- Slim classic design and beautiful genuine wood frame
- 256 MB of internal memory stores up to 2,000 images
- Built in speakers
- OPTIPIX Pro Software pre-installed

SP15MW

Outstanding picture quality and contemporary styling make this large 15 inch digital picture frame an excellent choice for the home, office or business. Whether displayed on a counter top or mounted to a wall, this frame will show ordinary photos and presentations in their best possible light.

Businesses will find this large digital frame perfect for promoting products or services in a new, eye-catching way. The included remote control makes operation simple. Updating the internal memory with new pictures or slides is easy with the help of the pre-installed OptiPix™ Pro software for Windows. This proprietary software “smart scales” photographs so that approximately 2,000 images can be stored on the internal memory.

Short Description

- 15 inch XGA display with 1024x768 resolution
- Adjustable and sturdy stand
- Beautiful solid genuine wood frame
- Import pictures, videos, and music from any popular memory card
- 256 MB of internal memory stores up to 2,000 images
- Built in speakers
- OPTIPIX Pro Software pre-installed
